

Excel Tables Export

Export tables to Excel quickly and easily

Excel is one of the leading formats for viewing and analyzing table data. The default Excel export component included with Dimensions provides this capability. However, it applies only limited formatting and can be slow depending on the number of tables exported. For example, some projects take 30 minutes or more to export to Excel.

The Verge Excel Export component has been developed to allow for rich formatting as well as significantly increased performance. The Verge Excel export gives users the capability to:

- Export 100's of tables in seconds
- Produce formatted ready to use Excel documents
- Export a wider variety of document formats
 - Microsoft Office 2003 (XLS)
 - Microsoft Office 2007 (XLSX)
 - Adobe PDF (PDF)
 - Excel HTML Document (HTM)
- Works with a variety of Dimensions products
 - mrStudio
 - Desktop Reporter
 - mrTables

Verge Excel Export in Desktop Reporter

Better Formatting

Based on customer feedback, the Verge Excel Tables Export has some additional formatting options applied that enhance the looks of the Excel tables.

The top diagram shows the default Excel export. The bottom diagram shows the Verge Excel export with colored borders and grid borders applied.

	Gender of respondent			Age of respondent								
	Base	Male	Female	Base	11-16 years	17-20 years	21-24 years	25-34 years	35-44 years	45-54 years	55-64 years	65+ years

Verge Export

Faster Export

The following benchmark is from a real customer project which contained 300 tables.

- Default Excel Export = 30 minutes
- Verge Excel Tables Export = 5 seconds
